

Introducing the Boomerang

Australia's Leading Basketball Training Aid

The Boomerang, Australian designed and manufactured Portable Basketball Return System is the world's most versatile, user friendly and effective basketball training aid! Specifically designed to enhance the effectiveness of basketball shooting practice, the Boomerang can be used in a number of different configurations permitting a vast array of training drills to be performed. The Boomerang can be used for individual, small group, or entire team/class practice sessions or lessons and is the perfect training and teaching tool for basketball coaches and physical education instructors/teachers working with players/students at any level from beginner to elite.

Improved "quality" of practice...

Perfect practice makes perfect! The Boomerang's unique net design forces players to shoot with the biomechanically optimum trajectory (i.e. "arc") on their shot, preventing "flat shots" and greatly enhancing the quality of practice (even without a coach or teacher present).

Greater repetitions and time on task...

By returning both missed and made shots the Boomerang also vastly enhances the quantity of practice through increased repetition and greater time on task.

Accelerated motor skill learning & muscle memory...

The Boomerang eliminates the usual time delay between shot attempts. Reducing this time delay between shot attempts ensures that the mental picture and feedback from the previous shot is still vivid and strong, permitting the player/student to learn and instantaneously make the necessary adjustments to their next shot. Players/students often very quickly then get into a "groove" of repetitive high quality skill execution which rapidly develops their muscle memory, and (with regular use of the Boomerang) they will retain this good form and transfer it into games.

Quick and easy to set-up and take down...

The Boomerang is easily set up by one person. When set up the Boomerang is completely portable and can be wheel off to the side of the court and parked.

Boomerang facilitates inclusive coaching...

The Boomerang is the ultimate training aid for wheelchair basketballers, professional or novice. The net height and ball return ramp height are both perfect for wheelchair use.

Also, the entire Boomerang unit when set up can be moved from off the court and set up under the basket ready for use from a wheelchair.

Also, the Boomerang is just so much fun to use that it is a very effective fun incentive for more sedentary students or students with a disability to enjoy greater participation in school basketball sessions.

Compact design for easy storage..

The Boomerang's innovative design allows it to be quickly dismantled for easy compact storage or transportation between training venues.

Boomerang Optional Extra's...

The Boomerang also has a couple of optional extra, "addon" components available which provide even greater versatility and variety. The Boomerang "Passback" (shown below) can be used either as a stand alone passing trainer or in conjunction with the Boomerang to facilitates pass, catch and shoot drills.

Passback™

D-Dummy™

The Boomerang D-Dummy attaches to the Boomerang ramp and can be used as a token defender or screener making individual practice more game specific.

*Attention Sports Masters, Netball & Volleyball Coaches

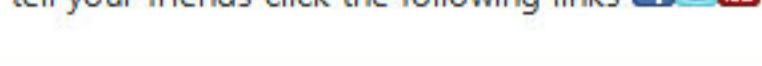

The Boomerang can also be very effectively utilised as a serving, digging, or setting target (and ball return system) for Volleyball practice drills, and the Passback and D-Dummy can also be creatively adapted for use in Netball drills.

What some of the best in the game say about the Boomerang...

I use and strongly recommend the Boomerang to "any" player serious about taking their game to the next level and becoming a truly great shooter".

Brian Goorjian

6 time NBL Championship winning Head Coach

"In my opinion; taking everything into account, the Boomerang is the most versatile, user friendly and time efficient basketball return system available, and in comparison to anything else on the market is excellent value for money for what the product offers".

Rex Nottage

Chairperson Basketball Australia Coaches Commission
Basketball Director - Newington College Sydney

The Boomerang is a very valuable shooting tool, and is used literally everyday here either with our Box Hill players or with State, ITCP or domestic players. I can have a group of players getting a productive shooting workout at one end on their own, yet I can still work at the other end and oversee everything without the need for another coach present. Also for individual practice the Boomerang is great; our players can come in, set the Boomerang up by themselves, and get up 100 shots of the bounce, 100 three point shots and 100 free throws in a very short amount of time. Because the Boomerang is so versatile in design having different mounting options for the chute and being able to use it with or without the ramp or the ball stop; I love how I get to invent drills that simulate different game like shooting situations. I can highly recommend the Boomerang!".

Kevin Goorjian

Head Coach - Box Hill Senior Secondary College Basketball Program
Former Assistant & Skills Coach - South East Melbourne Magic and Victoria Titans NBL
2 time NBL Championship Assistant Coach,
Former Head Coach - Nunawading Spectres Men's ABA

Invest in a Boomerang for Your School

Flexible and affordable purchase options...

The Boomerang is available in 3 standard models; the **Boomerang** (Base Model), **Boomerang Plus** and **Boomerang Pro**.

The Boomerang's design is completely modular and "upgrade kits" are available; this permits schools with limited budgets to purchase an entry level Boomerang and then add to it over subsequent years (as funds permit).
