

## Which model best fits your needs?

The Boomerang Portable Basketball Return System is the world's most versatile, user friendly and effective basketball training aid!

With regular use of a Boomerang, you too can experience rapid and vast improvements in your shooting ability and take your offensive game to a new level.

The Boomerang is available in three (modular) formats.

## Single Ramp Model

The Single Ramp Model is designed for "individual" and "small group" practice. Its unique patented design permits unrestricted instant rapid repetitive shooting practice from anywhere in the offensive court via the extendable ramp.

Pictured here with the optional "Passback™" and D-Dummy™ combo, the Boomerang allows pass-catch & shoot practice; plus it also provides "token defence" for more "game like" individual practice, permitting a single player to perform an endless array of practice drills; unrivalled by any other basketball training aid.

## Dual Ramp Model (Boomerang "Pro"™)

The Dual Ramp or "Pro" Model is our top of the range model and is suitable for clubs, associations or schools. (See overleaf)

The Boomerang Dual Ramp ("Pro" Model) has two ramps which move unrestricted from their respective corner of the court to the opposite elbow. The Boomerang "Dual Ball Diverter" can divert balls in 4 different directions, left-right or "alternate" or front-back or "alternate" offering coaches and players an even greater degree of variety than the single ramp model and opening up a plethora of additional training drills which can be performed.

The Boomerang "Pro"™ is the perfect product for high end professional and semi-pro basketball clubs, college and university basketball programs, and National or "high performance" basketball development programs.

## Domestic Model

The Boomerang "Domestic" Model is a stripped down "base model" Boomerang; it still offers the advanced strength durability and quality of the "Pro" model, however is a cost effective advanced training aid for the backyard or driveway.

The Boomerang "Domestic" returns balls via the ball return chute only (i.e. no ramp); it is simple and quick to set up, compact for easy storage, completely portable, and can be used with any "fixed" or "portable" 10' high basketball ring and backboard system.

The Boomerang is completely weatherproof and can be left set up in the backyard or driveway year round in all weather conditions.

## Accessories

The Boomerang has several accessories available as optional extra's which greatly enhance the functionality of the Boomerang and provide greater versatility to players and coaches to perform a greater range of practice drills.

Passback™

D-Dummy™

Promotional Ball Holder

The "will to win" is important; but the will to "prepare to win" is essential...

Practice with Purpose!

# BOOMERANG

Basketball Return System

TM

## Gravity Never Wears Out

No mechanical or electronic components that can fail

Highly durable construction that can be used outdoors

= Years of reliable service

## Simplicity

Easily and quickly set up by one person. Under 4 minutes from "set-up to shoot".

## Versatility

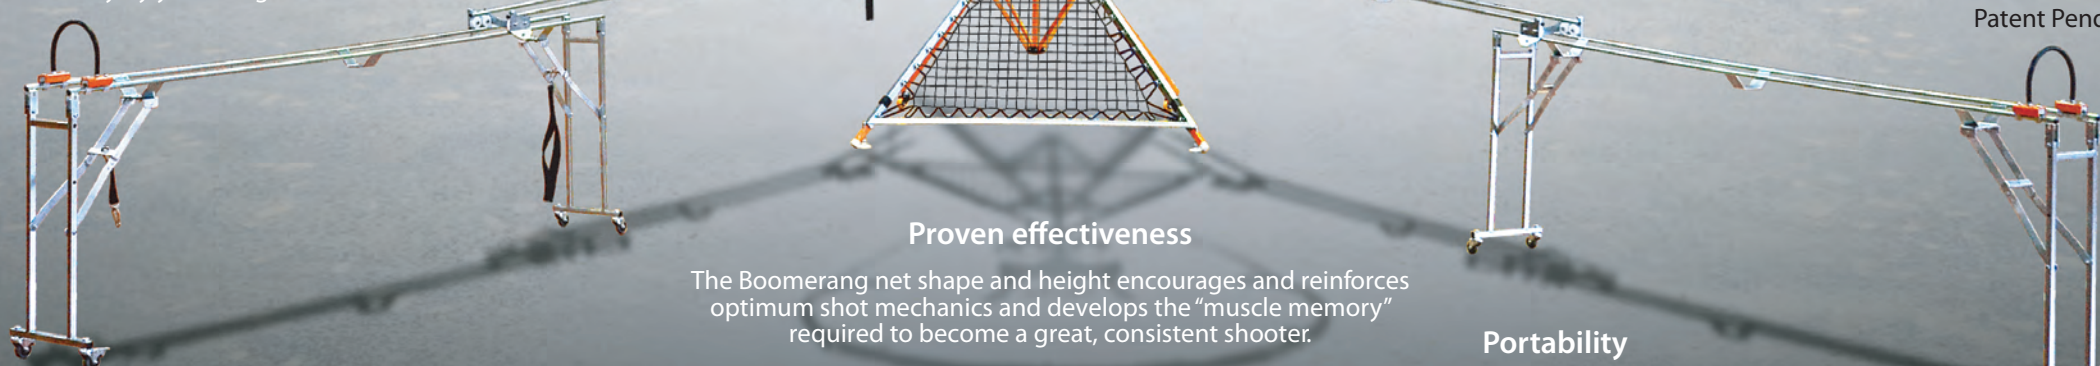

Ball return ramps move unimpeded from corner to corner of the court and extend beyond the NBA 3 point line.

Choice of "high" or "low" chute mounting positions.

Can be used with or without ramps connected.

One player, more than one player, or the entire team can execute countless different practice drills.

Limited only by your imagination.

Patent Pending

## Proven effectiveness

The Boomerang net shape and height encourages and reinforces optimum shot mechanics and develops the "muscle memory" required to become a great, consistent shooter.

## Affordable Modular Design

Don't Blow the Budget; get the functionality of more expensive alternatives.

Start with the base model - add to it over time.

## Compact, space saving design

Dismantles quickly and easily (under 3 minutes).

Extremely compact for easy storage and transportation.

Fits in a regular station wagon vehicle.

## Portability

Completely portable and lightweight.

Rolls away when not in use.
